TANK BOOSTER COMBINATION 1.6MPA 90L VBA43A-SDV11980

The specialty regulator series VBA is a booster regulator that saves money and energy by increasing the main line pressure up to two times. The booster regulator, when connected to air supply line, increases pressure up to two times and the main air supply pressure may be set low. Desired pressure increase can be easily adjusted.

- Service life increased.
- Noise reduced.
- Condensation reduced.
- Reliability improved.
- Assembled on 90 liter tank.

Specifications

Brand	**SMC**
Quantity (liter)	**90**
Airpress max. (MPa)	**1,6**
