

# BOLT CLEANER SET MBC-30S

This wheelbolt cleaner set is especially developed for the truck tire service and enhanced safety on the road. During the process of changing the wheels, the thread of the bolts and nuts needs to be cleaned (removing dirt, dust and corrosion). Only clean bolts and nuts should be used in the tightening of the wheel nuts, ensuring that the applied torque is giving the correct clampforce to the wheels. The set consists of:

- \* One handheld airtool, 1800 rpm with 1/4" Hex chuck
- \* Four boltcleanercups with inner wirebrush, for M20, M24 and M30 bolts
- \* Three hole brushes, for M20, M24 and M30 nuts and holes.
- \* One hole buff
